

I am writing about k-love radio station. This station is very important in our society today. It helps me and my family with uplifting music and talk without singing or talking about drugs, sex, violence and all the things most other stations promote. The effect on the local community if k-love were to be displaced by an LPFM broadcasted proving other programming could and most likely be harmful especially to the younger crowd who is used to hearing the bad music these days. I believe the service k-love provides to community teaches and supports good morals and living a high integrity life. What other kind of station does this? This station "k-love" is the most needed station for the people in the world. No joke!!
